Alipa Group Opens its Doors to Young Europeans

The Alipa Group, based in Wiltz in the north of the Grand Duchy, in collaboration with the Lycée du Nord, opened its doors to a group of twenty young students from all over Europe who came to visit the workshops of the group's subsidiaries: NO-NAIL BOXES, CODIPRO, LIFTEUROP and AllPack Services.

The young students are part of two European projects in which the Lycée du Nord of Wiltz is participating: LEONARDO-MOBILITY "Living and working in Europe" and COMENIUS "Applying for a job abroad - Internship network." Both programs aim to promote and encourage student mobility through periods of training courses across Europe.

"It is our duty to welcome these young people during visits and internships to strengthen the link between the school and the professional world and help young people to understand how a business works," stated Michèle Detaille, Managing Director of the Alipa Group.
